And read this!

software-setup.pdf

Software Prerequisites

- We are building an API server in 3 languages. You need the following:
  - Node.js, 0.8.8 or later
    - http://nodejs.org/
  - Apache Maven, 3.0.3 or later
    - http://maven.apache.org/download.cgi
  - Java 7 (patch 21 or greater recommended)
    - http://www.oracle.com/technetwork/java/javase/downloads/index.htm

Client Prerequisites

- To run the objective-c client, you will need XCode 5.0 or greater
    - https://developer.apple.com/xcode/
- You will also need cocoapods
    - http://cocoapods.org/

Testing your software

- You can (and should) test your dependencies as follows
  - Copy the contents of this gist:
    - https://gist.github.com/fehguy/7106332
  - To a file called "pom.xml"
  - In that directory, run "mvn package"
